FILM CONVERTERS LTD

Imagine a film that offered you the best of both worlds.  
A film that delivered genuine environmental benefits  
whilst offering true advantages to your business.  
Now discover the reality. Experience STC Coreless Lite  
from STC Film Converters Ltd...

Not to scale. For illustrative purposes only.

## Better for the environment

STC Coreless Lite provides all the benefits of STC Lite with the total elimination of the cardboard core, and gives the following EXTRA benefits:

- No cardboard core means no associated storage or disposal costs.
- Reusable ergonomic plastic dispenser is effortlessly switched from one reel to the next, ending the hot hands and fingers typically associated with traditional cardboard cores.
- No wasted film left on the core at the end of the reel, every last metre of stretch film can be used.
- The elimination of the cardboard core typically reduces the reel weight by up to 15%, reducing strain on the user.

STC Coreless Lite offers all the quality, reliability and performance you would expect from an STC product, but thanks to special manufacturing techniques is pre-stretched to 7 microns. This means you use less film by weight to wrap a given load, in turn creating less packaging waste. In addition, this thinner gauge also means you get more film per reel leading to a reduction in film deliveries and associated vehicle emissions. Plus, STC Coreless Lite is 100% recyclable and can be processed through industrial film recycling facilities.

## Better for your business

In addition to these green benefits, STC Coreless Lite also offers the following commercial advantages:

- **Easier to apply.** By virtue of it being prestretched, STC Coreless Lite is easier to apply which can help to increase productivity and minimise the risk of injury or strain.
- **Exceptional performance.** Despite its light weight and thin gauge, STC Coreless Lite offers levels of strength comparable to conventional hand films. It also benefits from good grip for enhanced load security.
- **Better value for money.** STC Coreless Lite offers all the quality, reliability and performance you would expect from an STC product, but thanks to special manufacturing techniques is pre-stretched to 7 microns. This means you use less film by weight to wrap a given load, in turn creating less packaging waste. In addition, this thinner gauge also means you get more film per reel leading to a reduction in film deliveries and associated vehicle emissions. Plus, STC Coreless Lite is 100% recyclable and can be processed through industrial film recycling facilities.
