quality, prices and service!

STC Lite

The latest generation in pre-stretched film

Distributed by

Imagine a film that offered you the best of both worlds.
A film that delivered genuine environmental benefits
whilst offering true advantages to your business.
Now discover the reality. Experience STC Lite from
STC Film Converters Ltd...

Better for the environment

STC Lite offers all the quality, reliability and performance you would expect from an STC product, but thanks to special manufacturing techniques is pre-stretched to 7 microns. This means you use less film by weight to wrap a given load, in turn creating less packaging waste. In addition, this thinner gauge also means you get more film per reel leading to a reduction in film deliveries and associated vehicle emissions. Plus, STC Lite is 100% recyclable and can be processed through industrial film recycling facilities.

Better for your business

In addition to these green benefits, STC Lite also offers the following commercial advantages:

- **Easier to apply.** By virtue of it being pre-stretched, STC Lite is easier to apply which can help to increase productivity and minimise the risk of injury or strain.
- **Exceptional performance.** Despite its light weight and thin gauge, STC Lite offers levels of strength comparable to conventional hand films. It also benefits from good grip for enhanced load security.
- **Better value for money.** Thanks to its thinner gauge and ability to wrap more pallets per reel, STC Lite gives you exceptional value for money. Plus, as fewer deliveries are required, you'll spend less time on administration and goods inwards.
